Summary — AI/ML professional with 1 year of hands-on experience in Artificial Intelligence and Machine Learning, skilled in Python, SQL, Generative AI, AI Agents, LLMs, and Machine Learning algorithms. Experienced in developing applications, building predictive models, integrating AI solutions, and leveraging data-driven techniques to solve real-world problems.

Skills

GenAI/AI Agents : RAG, AI Agents, LLMs, MCP, Prompt Engineering, Tool calling
Frameworks : LangChain, LlamaIndex, Hugging Face,

Scikit-learn, Pandas, NumPy, Matplotlib
Databases/Cloud : PostgreSQL, MySQL, Google BigQuery
Deployment : Docker, Linux, FastAPI, REST APIs, Git

Experience

Unicloud

Apr 2026 – Present

GenAI Engineer(Trainee)

Noida,UP

- Developed **Generative AI and LLM applications** using Python, OpenAI API, Hugging Face, Ollama, and vLLM. Built **RAG pipelines** using embeddings, FAISS, vector databases, LangChain, and LlamaIndex for context-aware applications.
- Developed **AI Agents and Agentic AI workflows** using Tool/Function Calling, ReAct, MCP, Multi-Agent Systems, and workflow orchestration.
- Implemented **LLM inference and routing** using vLLM and Semantic Router; worked with NLP, Transformers, Prompt Engineering, and LLM fine-tuning.
- Deployed AI solutions using **FastAPI, REST APIs, Docker, Linux, and Git**, supporting scalable LLM-based applications.

FORTIVE

Aug 2025 – Feb 2026

Data Science and AI intern

Bengaluru,Karnataka

- Cleaned and transformed business datasets using **SQL** and **Excel**, ensuring data accuracy and integrity.
- Built ETL workflows using **Supermetrics, Salesforce**, and **Google BigQuery** to extract, transform, and load CRM data.
- Automated **REST API** data extraction using **Python**,EDA, converting JSON data into structured CSV/Excel formats and developed **Power BI dashboards** for business reporting.

Education

Chandigarh University

Aug 2023 – Sep 2025

Master of Computer Applications (AI-ML) CGPA : 7.49

Mohali,Punjab

Manav Rachna University

Jul 2020 – Aug 2023

Bachelor of Computer Applications CGPA : 8.00

Faridabad,Haryana

Projects

AI-Powered RAG Document Q&A System

- Built an AI-powered RAG system using Python, FastAPI, LangChain, Celery, Redis, Milvus, LLMs, PyMuPDF, Tesseract OCR, OpenCV, document chunking, metadata processing, embeddings, vector search, BM25, and Cross-Encoder reranking for PDF-based question answering and context retrieval.

Book Search Engine

- Built an AI-powered hybrid search engine using Flask, Streamlit, FAISS, Apache Solr, PostgreSQL, MySQL, and LLMs. Implemented semantic search using Sentence Transformers (all-MiniLM-L6-v2) with 384-dimensional embeddings and FAISS.Developed keyword search with Solr and combined semantic and keyword results.Added LLM-based query expansion, multilingual translation, spelling correction, history-aware search, and result reranking.

Invoice Processing Agent

- Built an end-to-end invoice processing system for multi-format document ingestion, OCR, data extraction, and PostgreSQL integration.Implemented 40+ field extraction with bounding-box mapping and confidence scoring .Developed validation, arithmetic checks, duplicate detection, error handling, and Edit → Approve → Reject workflow with revalidation.Integrated PostgreSQL via MCP for duplicate checks, approved-data insertion.

Certifications/Publications

1.Introduction to Artificial Intelligence by **Coursera** 2. Machine Learning using Python by **Simplilearn** 3. Data visualization and dashboards by **IBM** 4. Data Analytics by **Google**
